Best practice I

Title of the practice: Cleaning of the college campus

This college is situated in an area of 12 Acres. It has 250 trees and other foliage. Thus, there is always a lot of plant wastage in the forms of leaves and wood.

Imbued by the "Swachh Bharat Abhiyan" started on 2nd October 2014 on the occasion of the birthday celebration of the father of the nation "Mahatma Gandhi" the college has taken up this task with great diligence.

The process:

The process begins generally in July/ August with the start of the academic year. The strength of the team is 100 students composed of 50 NSS students and 50 freshers on rotational bases. The students are asked to take out weeds and other waste material. This biodegrade material is dumped into a pit of 100 cubic feet. This is left to decompose into organic manure. This process is done once a week on Saturday from 10 am to 11 am.

The entire gamut of this exercise is led by the N.S.S coordinator and other faculty on rotation.

This exercise has made a distinct impact on the cleanliness of the camp, is also on the ability of students to work in team spirit.

Problems encountered:

No major problems were encountered. The small requirements of brooms/ pades and other pruning materials were provided by the college.

2017-18

Best practice II

Title of the Practice: Tree plantation

Objectives of the Practice:

Global warming is a hotly debated topic and needs no emphasis. This college is situated on 12 acres of campus and provides enough space for tree plantation which can make the campus green and pollution-free.

The Context:

The management of the college wanted that some action to be taken to reduce the effect of hot weather on the campus and had identified space for additional tree plantation.

The Practice:

The team sought the help of the department of forestry and they felt that at present planting needs would be of great ease and help. Thus 20 neem trees were planted during June/July 2017

Evidence of Success:

20 neem plants have been planted by the students on a college campus. Now we are hoping that after this rainy season, these planted trees will provide us with feelings of happiness. The Forest department suggested that we should take slightly grown-up saplings having a height of about a meter. This suggestion was accepted. The digging of soil and its preparation was undertaken by the students.

Problems Encountered and Resources Required:

The following problems were encountered

- Shortage of piped water for each tree.
 - Guards/ protection through barbed wire to the saplings as fencing.
- These issues have been discussed with the Principal, who said he will take up the matter with the management
